
Post Doctorate Information

Name Dr. Srinivasa Ponnaluru

Institution IMPACT Center, Washington State University, Pullman

State WA

Faculty Supervisor _____

Department _____

Project Title _____

Start Date _____

Project Summary: (brief paragraph)

Economic modeling and research in the area of specialty crops grown under high tunnels and biodegradable mulches. Research topics include (i) development of enterprise budgets for specialty crops (tomato, strawberry, lettuce) grown in the state of Washington; (ii) conducting cost benefit analysis of adoption and farming under high tunnels and BDMs; (iii) development of definitions tailored to meet the specific needs of the project for concepts like clean technology; (vi) life cycle analysis of BDMs; and, (v) identification of strategies for mitigation of risk due to wind for high tunnels.
